

Dentist Handbook

National Processing Policies

Introductory Note

These national processing policies have been revised to reflect data code set requirements set forth under the Administrative Simplification Provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and related regulations. It is the policy of Delta Dental to comply with all such requirements as well as to require all Delta Dental member companies and their participating dentists to comply with such requirements. However, consistent with HIPAA, Delta Dental exercises its right to determine claims reimbursement procedures and requires the processing of such codes in accordance with the following policies, unless prohibited under other applicable law or specific group/individual contract provisions (described below). Notwithstanding, treatment of procedures under the national processing policies, dentists are required to utilize those procedure codes reflective of services rendered and in accordance with HIPAA. Amounts charged under any procedure shall not be inflated or manipulated in light of the processing policies. Delta Dental member companies shall ensure that their application of these processing policies is consistent with their contractual obligations to groups and enrollees.

General Policies

General policies (GP) related to each category of procedure codes precede the category code listing. Policies for specific procedure codes are listed in each category after the codes and nomenclature.

Terms of group/individual contracts vary. Policies in this Handbook that address benefits, limitations and exclusions are "model" policies that have not been tailored to reflect the specific terms of applicable group/individual contracts. This Handbook may not fully or accurately reflect the terms of applicable group/individual contracts, and may be inconsistent with such terms. In all cases, the terms of group/individual contracts take precedence over Dentist Handbook policies. Please contact the member company listed on the patient's identification card for the specific terms of a group/individual contract.

For the purposes of this manual, the following definitions apply:

Allowance: The amount of Delta Dental's payment for the procedure benefitted.

Approved Amount: The total fee a participating dentist agrees to accept as payment in full for a procedure. It includes both the Delta Dental allowance and the

patient responsibility. Participating dentists agree not to collect from the patient any difference between the approved amount and their actual fee for the procedure.

Denied/Deny If the benefit for a procedure or service is denied, the procedure or service is not a benefit of the patient's coverage and the approved amount is collectable from the patient. Specific group/individual contract provisions take precedence over processing policies. It is recommended that the dental office contact the appropriate member company for the group/individual account to determine the specific benefits, limitations and exclusions.

Disallowed: If the fee for a procedure or service is disallowed, it is not benefitted by Delta Dental or collectable from the patient by a participating dentist.

Alternative Benefit: In cases where alternative methods of treatment exist, benefits are provided for the least costly, professionally acceptable treatment. This determination is not to recommend which treatment should be provided. It is a determination of benefits under terms of the patient's coverage. The dentist and patient should decide the course of treatment. If the treatment rendered is other than the one benefitted, the difference between Delta Dental's allowance and the approved amount for the actual treatment rendered is collectable from the patient.

In Conjunction With: In conjunction with means as part of another procedure or course of treatment including, but not limited to, being rendered on the same day.

Processed as: When a procedure is processed as a different procedure, participating dentists agree to accept all the limitations, processing policies, and approved amounts that apply to the procedure Delta Dental benefits.

All services provided to Delta Dental members are subject to the following general policies:

- Documentation of extraordinary circumstances can be submitted for review by report.
- Individual consideration may be given if additional supporting documentation is provided (e.g. diagnostic quality radiographs, clinical notes, charting, etc.)
- Fees for completion of claim forms and submission of documentation to Delta Dental to enable benefit determination are not benefits. They are not collectable from the patient by a participating dentist.
- Infection control and OSHA compliance are included in the fee for the dental services provided. Separate fees are disallowed and not collectable separately from the patient by a participating dentist.

- Multistage procedures are reported and benefitted upon completion. The completion date is the date of insertion for removable prosthetic appliances. The completion date for immediate dentures is the date that the remaining teeth are removed and the denture is inserted. The completion date for fixed partial dentures and crowns, onlays and inlays is the cementation date of the final restoration regardless of the type of cement utilized. The completion date for endodontic treatment is the date the canals are permanently filled.
- Charges for procedures determined not to be necessary or not meeting generally accepted standards of care may be denied or disallowed. Many of the processing policies that follow, describe payment procedures that are based on the timing and sequence of inter-related procedures. However, the timing and sequencing of treatment is the responsibility of the dentist rendering care and should always be determined by the treating dentist based on the patient's needs.
- When a procedure is by report and subject to coverage under medical, it should be submitted to the patient's medical carrier first. When submitting to Delta Dental, a copy of the explanation of payment or payment voucher from the medical carrier should be included with the claim, plus a narrative describing the procedure performed, reasons for performing the procedure, pathology report if appropriate, and any other information deemed pertinent. In the absence of such information, Delta Dental will not benefit the procedure.
- The term specialized procedure describes a dental service or procedure that is used when unusual or extraordinary circumstances exist, and is not generally used when conventional methods are adequate.
- Additional supporting documentation may be requested in order to make a benefit determination
- Narratives as documentation are not considered legal entities therefore, in some situations, the patient record/clinical notes may be requested.

DIAGNOSTIC D0100 - D0999

Terms of group/individual contracts vary. Policies in this Handbook that address benefits, limitations and exclusions are "model" policies that have not been tailored to reflect the specific terms of applicable group/individual contracts. This Handbook may not fully or accurately reflect the terms of applicable group/individual contracts, and may be inconsistent with such terms. In all cases, the terms of group/individual contracts take precedence over Dentist Handbook policies. Please contact the member company listed on the patient's identification card for the specific terms of a group/individual contract.

Clinical Oral Evaluations

- GP The number and type of evaluations available for benefits are based on group/individual contract.
- GP Comprehensive, periodic and periodontal evaluations include but are not limited to a thorough evaluation and recording of the extraoral and intraoral hard and soft tissues. This would include the evaluation and recording of the patient's dental and medical history and general health assessment. It may typically include the evaluation and recording of dental caries, missing or unerupted teeth, restorations, existing prostheses, occlusal relationships, periodontal conditions (including periodontal charting), hard and soft tissue anomalies, oral cancer evaluation, consultations, diagnosis, treatment planning, screening and assessment of a patient or other procedures typically part of a patient evaluation.
- D0120 Periodic oral evaluation – established patient
- The fees for consultation, diagnosis, and routine treatment planning are **DISALLOWED** as components of the oral evaluation, by the same dentist/dental office.
- D0140 Limited oral evaluation - problem focused
- D0145 Oral evaluation for a patient under three years of age and counseling with primary caregiver
- This is not a comprehensive evaluation. Therefore, a comprehensive oral evaluation (D0150) is allowed for the same patient and by the same dentist/dental office at a subsequent date.
- Oral evaluation includes any caries susceptibility tests (D0425) or oral hygiene instructions (D1330) provided on the same date. When performed on the same date, any fees for D0425 and D1330 are **DISALLOWED**.

Benefits for D0145 for a child three years of age or older are considered miscoded and will be processed using the correct evaluation code.

For patients under the age of three, any other comprehensive evaluation code submitted (D0150, D0160, D0180) is payable as D0145. Subsequent evaluations are benefitted as D0120.

D0150 Comprehensive oral evaluation – new or established patient

A comprehensive oral evaluation is payable once per patient per dentist. Additional comprehensive evaluations of any type when billed by the same dentist/dental office are processed as periodic evaluations, and any fee charged in excess of the approved amount for the periodic evaluation is DISALLOWED.

dentist/dental office are processed as periodic evaluations, and any fee charged in excess for the approved amount for the periodic evaluation is DISALLOWED.

This evaluation should not be reported in addition to a comprehensive oral evaluation (D0150) by the same dentist/dental office in the same treatment series. This procedure is not intended for use as a separate code for periodontal charting.

If a D0180 is submitted with D4910 by the same dentist/dental office it is benefitted as a D0120 and the difference in the approved amount is DISALLOWED unless the D0180 is the initial evaluation by the dentist rendering the D4910.

In all other instances, the fees for interpretation are DISALLOWED.

The FDA/ADA 2012 document Selection of Patients for Radiographic Examinations provides guidance for when the prescription of a full mouth series of radiographs is appropriate. These guidelines state that radiographs are to be prescribed by dentists only after reviewing the patient's health history and completing a clinical examination. Once a decision to obtain radiographs is made, it is the dentist's responsibility to follow the ALARA Principle (As Low as Reasonably Achievable) to minimize the patient's exposure to radiation. For most new patient encounters in dentate adults, and children or adolescents with transitional or permanent dentition, an individualized radiographic exam is appropriate, usually consisting of selected periapical images, posterior bitewings and a panoramic exam. A full mouth intraoral radiographic exam is usually performed when the patient has clinical evidence of generalized dental disease or history of extensive dental treatment. <http://www.fda.gov/Radiation-EmittingProducts/RadiationEmittingProductsandProcedures/MedicalImaging/MedicalX-Rays/ucm116504.htm> Table 1. from these guidelines is provided here:

| TYPE OF ENCOUNTER | PATIENT AGE AND DENTAL DEVELOPMENTAL STAGE | | | | |
|--|--|---|--|--|---|
| | Child with Primary Dentition (prior to eruption of first permanent tooth) | Child with Transitional Dentition (after eruption of first permanent tooth) | Adolescent with Permanent Dentition (prior to eruption of third molars) | Adult, Dentate or Partially Edentulous | Adult, Edentulous |
| New Patient* being evaluated for oral diseases | Individualized radiographic exam consisting of selected periapical/occlusal views and/or posterior bitewings if proximal surfaces cannot be visualized or probed. Patients without evidence of disease and with open proximal contacts may not require a radiographic exam at this time. | Individualized radiographic exam consisting of posterior bitewings with panoramic exam or posterior bitewings and selected periapical images. | Individualized radiographic exam consisting of posterior bitewings with panoramic exam or posterior bitewings and selected periapical images. A full mouth intraoral radiographic exam is preferred when the patient has clinical evidence of generalized oral disease or a history of extensive dental treatment. | | Individualized radiographic exam, based on clinical signs and symptoms. |
| Recall Patient* with clinical caries or at increased risk for caries** | Posterior bitewing exam at 6-12 month intervals if proximal surfaces cannot be examined visually or with a probe | | Posterior bitewing exam at 6-18 month intervals | | Not applicable |
| Recall Patient* with no clinical caries and not at increased risk for caries** | Posterior bitewing exam at 12-24 month intervals if proximal surfaces cannot be examined visually or with a probe | Posterior bitewing exam at 18-36 month intervals | Posterior bitewing exam at 24-36 month intervals | | Not applicable |
| Recall Patient* with periodontal disease | Clinical judgment as to the need for and type of radiographic images for the evaluation of periodontal disease. Imaging may consist of, but is not limited to, selected bitewing and/or periapical images of areas where periodontal disease (other than nonspecific gingivitis) can be demonstrated clinically. | | | | Not applicable |
| Patient (New and Recall) for monitoring of dentofacial growth and development, and/or assessment of dental/skeletal relationships | Clinical judgment as to need for and type of radiographic images for evaluation and/or monitoring of dentofacial growth and development or assessment of dental and skeletal relationships | Clinical judgment as to need for and type of radiographic images for evaluation and/or monitoring of dentofacial growth and development, or assessment of dental and skeletal relationships. PERIODONTICS D4000 - D4999

Terms of group/individual contracts vary. Policies in this Handbook that address benefits, limitations and exclusions are "model" policies that have not been tailored to reflect the specific terms of applicable group/individual contracts. This Handbook may not fully or accurately reflect the terms of applicable group/individual contracts, and may be inconsistent with such terms. In all cases, the terms of group/individual contracts take precedence over Dentist Handbook policies. Please contact the member company listed on the patient's identification card for the specific terms of a group/individual contract.

GP The fee for the following services: D1110, D1120, D4355, and/or D4910 may be DISALLOWED if the services are rendered by the same dentist/dental office within 30 days after the most recent scaling and root planing (D4341, D4342) or other periodontal therapy.

GP Fees for the included procedures are DISALLOWED and not billable to the patient by a participating dentist/dental office. These inter-related services include but are not limited to the following hierarchy:

D4260 (most inclusive), D4261, D6103, D4249, D4245, D4268, D4240, D4241, D6102, D4274, D4210, D4211, D4212, D4341, D4342, D4346, D4355, D4910, D1110, D1120 (least inclusive)

GP The fee for biopsy (D7285, D7286), frenulectomy (D7960) and excision of hard and soft tissue lesions (D7410, D7411, D7450, D7451) are DISALLOWED when the procedures are by the same dentist/ dental office performed on the same date, same surgical site/area, and any other surgical procedure. Request for individual consideration can always be submitted, by report, for the dental consultant for review.

GP Laser disinfection is a technique, not a procedure. Fees for laser disinfection are DISALLOWED. If done as a standalone procedure, the benefit for laser disinfection is DENIED and the approved amount is collectable from the patient.

- GP The fees for low level laser therapy when performed as part of another procedure are DISALLOWED. When billed as a standalone procedure, benefits for low level laser therapy are DENIED as investigational.
- GP Periodontal charting is considered as part of the oral evaluation (D0120, D0150, D0160, D0180). If periodontal evaluation and oral evaluation are billed on the same date of service the fee for the oral evaluation (D0120, D0150, D0160) is a benefit and the fee for the periodontal evaluation is DISALLOWED.
- GP When periodontal charting is requested for surgical and non-surgical procedures it must be submitted with a periodontal chart dated no more than 12 months prior to the date of service.

The following categorizes procedures for reporting and adjudicating by quadrant, site or individual tooth in order to enhance standard benefits determination and expedite claims processing.

Radiographs must show loss of alveolar crest height beyond the normal 1-1.5 millimeter distance to the cemento-enamel junction (CEJ). Note: panoramic radiographs per American Academy of Periodontology have limited value in the diagnosis of periodontal disease.

In the case of procedure codes D4341 and D4342 there must be radiographic documentation of bone loss or loss of clinical attachment on the diseased teeth/periodontium involved. In the absence of bone loss or loss of clinical attachment, a benefit allowance for a prophylaxis (D1110) or scaling in the presence of moderate to severe gingival inflammation (D4346) is made and any fee in excess of the approved amount for D1110 is chargeable to the patient.

Prior to periodontal surgery, a waiting period of a minimum of four weeks should typically follow periodontal scaling and root planing to allow for healing and re-evaluation and to assess tissue response.

This is only a benefit when bone is removed and sufficient time is allowed for healing.

The fees for crown lengthening are DISALLOWED when performed on the same date as the final restoration placement.
