We use this information to enhance our plan designs in ways that improve your health and save you money.

Your new coverage includes additional routine teeth cleanings (prophylaxes) or periodontal maintenance cleanings per benefit period (rather than the standard two) for people with certain health conditions.

Health conditions that qualify for up to 4 cleanings per year:

- Diabetes and Periodontal Disease
- Renal Failure/Dialysis
- Infective Endocarditis High Risk Patients
- Dementia
- Chemotherapy/Radiation
- HIV Positive Status
- Stem Cell (Bone Marrow) Transplants

Health conditions that qualify for up to 3 cleanings per year:

- Patients in Active Orthodontic Treatment

If you have one or more of the conditions listed above, ask your dentist and physician how you can better manage your oral health to prevent infection and improve your condition. Keep in mind, the timing of your treatment can be critically important. Your dentist and physician can help you make the best treatment decisions at the most appropriate time, based on your health and history.
